Thanks Gabriela. Its on the calendar. Can we quickly schedule time to talk through a detailed agenda? Looks like you and Lene have a plan but we may need to work through very specific times and who will be talking. This meeting will take some discipline and organization by everyone. I'm completely open tomorrow for as long as we need.

Hi Peter,

We would really appreciate your facilitation services on September 14th as well as note-taking services from Elizabeth. I'll share my thoughts here on what I think we need and how the call will go and ask Lene to weigh in. We can certainly schedule a call to discuss this week.

This call is being convened by the Red Hill Project Coordinators to support information sharing and regulator decision making on the TUA Supplemental.

Here are my thoughts on how the call should go:

We'll start with introductions that go from top of the hierarchies on down for each AOC party. I can provide a list of attendees. Peter would then make some introductory remarks to orient folks to how we will run through the call. EPA and DOH will deliver the brief talking points we discussed to provide feedback to the Navy on the TUA Supplemental. Donald Panthen will have a set of a few slides he will run through to cover the org structure of the Navy/DLA folks that outline the lines of effort (engineering, operations, communications) at Red Hill. Donald will also present a slide on what he calls is "the way ahead." Then we can go one by one through the 12+ questions. Donald is coordinating responses to the questions and will have SMEs present. Regulators want to have a chance to ask follow up questions. I

think your main job through this is going to be to make sure we have the right amount of time allocated to each of the 12 (potentially a few more) questions and that if we veer too far in the weeds, that we table the detailed discussion for another call.

Earlier today, our EPA and DOH teams had a chance to prep for our Sept 14th call and review the list of questions and talking points. We determined that we would deliver the talking points associated with regulator concerns about the lack of information sharing and transparency during this Friday's (Sept 10) Principal's call. We will also be sure to communicate that we need information about the May 6th release asap. When Jeff/Kathy deliver these talking points again on September 14th, they can reference the discussion that was had on Sept 10th during the principal's call. Peter, on Sept 14th, you may need to facilitate a bit of dialogue about transparency and information sharing following the Jeff/Kathy talking points. I think we can regroup after the Principal's call to figure out how much time we think we will need for this discussion on the 14th. We do want to spend most of our time on the 14th on the questions and answers.

We don't have many opportunities to talk with this full set of AOC party folks very often and so I think we will all be going into the hopeful that there will be a productive outcome and that we want to make the most of the conversation. I'm looking forward to it.

Lene, please weigh in if you have adjustments to the above plan and Peter, let me know if you would like to talk before the Principal's call scheduled for this Friday at 9 am.

Oh, Peter, will you also see if Elizabeth is able to take notes for us on Sept 14th?

Thank you!
Gabriela

Hi Peter,

Lene and I will be talking with Donald Panthen at the Navy this afternoon to plan our call on the 14th. I should have an answer to your questions after that – this afternoon.

Thanks for the heads up on your schedule conflict.

Subject: Sept 14th

G'morning Gabriela,

Hope you had a good holiday and did something fun. Please confirm if you still want me to help structure and moderate the next session. I had an impression you may have wanted to do that yourself. I have someone else on a different project requesting a meeting at that same time which I will decline if I am still on for the 14th. Just need to know.
